

Pagoda-shaped Pneumatic Muffler Silencer

Product Overview

The E type pagoda-shaped pneumatic muffler silencer reduces exhaust noise from pneumatic valves, cylinders, and compressed-air systems. Its compact male-thread body and sintered copper structure provide stable airflow diffusion.

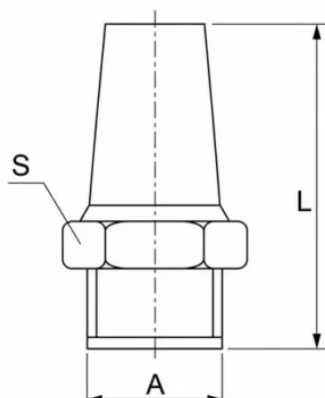

Key Features

- Compact E type pagoda-shaped threaded structure.
- Sintered copper construction for airflow diffusion.
- Reduces noise from compressed-air exhaust discharge.
- Direct male-thread installation on exhaust ports.
- Stable airflow performance for pneumatic equipment.
- Multiple thread sizes from 1/8 inch to 1 inch.

Technical Specifications

Parameter	Specification
Product Type	Pneumatic Muffler Silencer
Model	E Type
Structure	Threaded Exhaust Silencer
Connection	Male Thread
Material	Sintered Copper
Operating Fluid	Compressed Air
Function	Exhaust Noise Reduction
Working Pressure	0 - 1.0 MPa
Temperature Range	0 - 60 degrees C
Application	Pneumatic Valves / Cylinders / Air Systems

Model Selection and Dimensions

Thread Size (M)	L (mm)	S (mm)
1/8 inch	25	12
1/4 inch	34	16.5
3/8 inch	37	21.5
1/2 inch	44	26
3/4 inch	52	31.5
1 inch	64	40.5

Applications

- Pneumatic valves requiring quieter exhaust discharge.
- Air cylinders and general compressed-air systems.
- Industrial automation and production machinery.
- Machine installations requiring compact exhaust silencers.

Product Function

E type silencers diffuse exhaust air through a sintered copper structure to reduce operating noise and improve airflow smoothness compared with an open exhaust port.

Selection and Installation

- Match the male thread size to the pneumatic exhaust port.
- Confirm pressure, temperature, airflow, and installation clearance.
- Install securely without damaging or over-tightening the thread.
