

V-A Type Stainless Steel Pneumatic Muffler Silencer

Product Overview

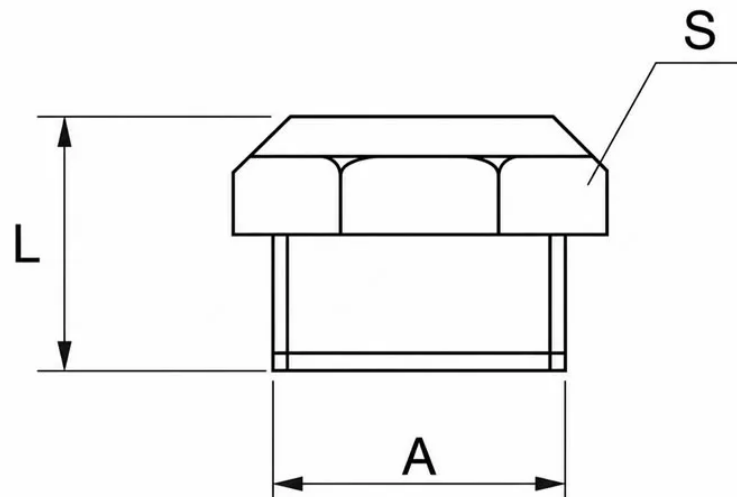

The V-A type stainless steel pneumatic muffler silencer reduces exhaust noise from valves, cylinders, and compressed-air systems. Its stainless steel construction provides corrosion resistance, durable performance, and stable airflow discharge in demanding industrial pneumatic applications.

Key Features

- Compact V-A pneumatic muffler structure.
- Stainless steel body for corrosion resistance.
- Effective compressed-air exhaust noise reduction.
- Threaded installation for easy mounting.
- Stable airflow discharge performance.
- Suitable for industrial pneumatic systems.

Technical Specifications

Parameter	Specification
Product Type	Pneumatic Muffler / Silencer
Model	V-A Type
Function	Exhaust Noise Reduction
Installation	Threaded Exhaust Port
Material	Stainless Steel
Operating Fluid	Compressed Air
Working Pressure	0 - 1.0 MPa
Temperature Range	0 - 60 degrees C
Applicable Equipment	Valves / Cylinders / Air Tools

Model Selection and Dimensions

Thread Size (A)	L (mm)	S (mm)
M5	7.5	8
1/8 inch	9.5	12
1/4 inch	11	17
3/8 inch	12.5	19
1/2 inch	13.5	22
3/4 inch	17	27
1 inch	20.5	34

Applications

- Pneumatic solenoid valves and air cylinders.
- Industrial automation systems requiring quieter operation.
- Pneumatic tools requiring reduced exhaust noise.
- Air control equipment requiring stable exhaust airflow.

Product Function

V-A silencers reduce compressed-air discharge noise while allowing airflow to exit smoothly. Their stainless steel construction provides durability, corrosion resistance, and stable exhaust performance.

Selection and Installation

- Confirm thread size before selecting the muffler.
- Confirm pressure, temperature, airflow, and installation clearance.
- Install securely without damaging or over-tightening the stainless steel thread.
